Dear Representative/Senator _____

**If Congress does not act before a looming February 29, 2012 deadline, physical therapy services will be placed under a hard Medicare Therapy Cap.** The below patients ask that Congress take legislative action to address the therapy caps in 2012 to prevent the therapy cap from going into place on March 1, 2012. The cap limits access to needed physical therapy services for seniors and persons with disabilities that need the care the most. The undersigned patients request your support to ensure that outpatient physical therapy benefits under Medicare are not subject to an arbitrary therapy cap beginning on March 1, 2012. **Please cosponsor "The Medicare Access to Rehabilitation Services Act of 2011" (H.R. 1546/S. 829), legislation that will eliminate the therapy cap once and for all.**
