

Common ICD-10 Codes: Orthopaedics

To help you identify appropriate ICD-10-CM codes to use, APTA has compiled a list of commonly used codes in orthopaedic physical therapist practice. The lists are not exhaustive and are not intended to be used exclusively. It is recommended that you check in the ICD-10 Alphabetic Index and Tabular lists to ensure there is not a code with more specificity or a different code that may be more appropriate to reflect the patient's condition.

Instructions:

To best navigate the list, first download this PDF file to your computer. Then navigate the document using the search feature in the toolbar. Finally, ensure that you look at the top of each category and work down to review notes or specific instructions.
