Login

Go to https://cpi.apta.org

Click Login.

Log in to your account using your APTA login credentials.

For login questions/issues: Email membersuccess@apta.org or call 800-999-2782 (APTA). This includes situations of multiple APTA accounts, password reset, and updating email addresses.

Users can also update their email address themselves by going to Contact Information. Please do not create a new account if one currently exists in the system.
Agree to the **Terms of Use**.

Once logged into the system, you will see your Dashboard.

Program Staff (DCE/ACCE, ADCE, Admin Staff) will be able to see the aggregate data for the program(s) they are associated with on the graphs on the dashboard.
## System Overview

<tr>
<td>Students</td>
<td>Complete CPI evaluations. View only permissions to review CI evaluation.</td>
</tr>
</tbody>
</table>

View Program Users
View current program users, user’s role, and CPI Training completion status of users associated with your program.

1. Click **Settings**.
2. Click **Users**, followed by the **Users** icon.
Note:

- The CPI Course Status column will remain blank until the user’s first login to the CPI 3.0.
- Administrative Staff do not need to complete the CPI 3.0 training.
- Clinical Instructors are not to be added to this Users section. Instructions for adding Clinical Instructors are included in the Sites section.

**Adding New Program Users**

This process is specifically for adding Program Staff to the CPI. We will discuss the process for adding students in the Creating Clinical Experience section (Adding Students as Users)

1. On the Users page, click **Add User** located on top right of the screen.

2. In the pop-up, enter the email associated with user’s APTA (member or non-member) account on which they completed (or plan to do) the training and click **Search**. If you receive a “No User Record Found” error, there is not an APTA account associated with that email address.
3. When the results populate, select the role from drop-down list to indicate the user’s role in your program.

4. Select your program from the drop-down list – make sure that they are added to the correct (PT/PTA) program.

5. Click Add.
Email Discrepancies and Log-In Issues

If a user logs in with a different email address than the one with which they have been added into the system, they will receive the following error: "You are currently not assigned a user role, program, or clinical site in the CPI 3.0 system. Please contact the DCE associated with the affiliated program to obtain access."

<table>
<thead>
<tr>
<th>Role</th>
<th>Situation</th>
<th>Resolution</th>
</tr>
</thead>
<tbody>
<tr>
<td>CI</td>
<td>Training completed on different email</td>
<td>Delete from site and re-add with correct email. OR Have them re-register for the correct CPI 3.0 training with the email in the system and reach out to CPI Support.</td>
</tr>
<tr>
<td>Student</td>
<td>Training completed on different email</td>
<td>If CI has not started assessment: Delete from site and re-add with correct email. OR If CI has started assessment: Have them re-register for the correct CPI 3.0 training with the email in the system and reach out to CPI Support.</td>
</tr>
<tr>
<td>CI or student</td>
<td>Two APTA accounts with same email</td>
<td>Use Member ID to log in and change email address for one of the accounts (can contact Member Success to get ID if not known)</td>
</tr>
</tbody>
</table>

If a user attempts to log in and gets an error saying that they have not completed the CPI 3.0 training, please have them confirm that they completed the correct training for their role. The training that they completed will be listed on their certificate, which users receive at the end of training. CPI 3.0 does not allow users to log in until they complete the correct training for their assigned user role. They must complete the correct training prior to logging in.

If the certificate says that they completed the correct training, please escalate to CPI Support. It is likely that the training did not push over to the APTA database correctly and that we will have to manually push it through.
Program Details

The Program page allows you to update your program information, including address, phone number and email address. Also on this page is the ability to control how you would like to share the CI CPI with your students and whether you want to require comments for each criterion on the CPI.

Updating Program Details

1. Click Settings.
2. Click Program, followed by the Program icon.
3. Select your program name
4. Review and update basic program details.
5. Set the CI CPI Evaluation sharing preferences automatically or manually. The difference is explained in the table below.

| Automaticlly | Once the CI submits their CPI evaluation of their student, and the student has completed their evaluation, the CI evaluation will be released to the student. |
Please note: The Student CPI evaluation will be shared with the CI upon submission independently of the choice selected here. The program default is to manually share CI assessments.

6. Set the requirement for comments to substantiate each rating for a criterion on the CPI.
   • Checking this will make the “Areas of Strength” and “Areas of Development” text boxes under the sample behaviors of each performance criterion in assessment required.

7. Click the Save button in the upper right corner of the page.
Setting Up Clinical Experiences

Setting up the clinical experiences in the CPI 3.0 can occur in two ways, manually in the system or via a spreadsheet import. However, both processes do require actions to be completed in the system first.

The general workflow for setting up your clinical experiences is as follows:

1. Creating/Adding Clinical Sites
   - The process for adding CIs to the clinical sites is discussed in the [Manual and Automatic/Spreadsheet process](#) for creating the clinical experiences.

2. Creating the Cohorts

3. Creating Clinical Experiences and releasing to Students and CIs
   - Manual Process
   - Automatic/Spreadsheet Process

The next set of instructions will follow this workflow.

**Step 1: Creating and Adding Clinical Sites**

Clinical sites must be manually added to your program prior to setting up your clinical experiences. This is a manual process in order to reduce the potential for duplication and incorrect data.

1. Click **Settings** from the top menu bar.

2. Click **Sites**, followed by the **Sites** icon.
3. Click **Add Site** in the top right corner of your screen.

<table>
<thead>
<tr>
<th>Site ID</th>
<th>Site Name</th>
<th>Contact Info</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>123456</td>
<td>APTA Center</td>
<td>Dr. Smith, P.O. Box 1234</td>
<td>Manage</td>
</tr>
<tr>
<td>789012</td>
<td>Navy Core Military</td>
<td>Captain Johnson</td>
<td>Manage</td>
</tr>
</tbody>
</table>

4. Follow the instructions on the Search and Add Sites screen to search for your site.
   - If the site you are looking for populates, proceed to Step 5.
   - If the site you are looking for does not populate, proceed to Step 9.

5. When you see the site you are looking for, click **Add to my Site**.
Confirm the site address and add the SCCE email address and contract dates, if applicable.

6. After entering the SCCE’s email address, click **Search** to have their name populate and identify if they will also be an CI.
7. Then click **Add to my Sites** (shown in the image above). The clinical site will now appear in your list of sites.

8. If you do not see the specific site you are looking for, you will need to add the site to the system. At the top right corner of the page, click **Create New**.

9. Enter the Clinical Site name and address (required fields), contract dates (if applicable, not required), and the SCCE email address (not required).
Create Site

Name of Clinical Site

Address Line 1

Address Line 2

City *

Contract End Date

Add Site Coordinator Of Clinical Education

Search by Email

Enter Email Address

Search

Close  Save
After entering the SCCE’s email address, click **Search** to have their name populate and identify if they will also serve as a CI (now or in the future).

### Notes:

- If you check that the SCCE can serve as a CI for PT/PTA students the SCCE’s name will appear as an option to pair with students. Do not attempt to also add the SCCE under the Manage Clinical Staff button discussed later.

- The process for adding CIs to the clinical sites is discussed in the Manual and Automatic/Spreadsheet process for creating the clinical experiences.

- On the Sites page, there are status buttons that will either say Pending or Complete. This refers to the status of the CSIF, which will be discussed later in this guide. These statuses do not affect your clinical experiences.

10. Click **Save** (shown in the image above). The clinical site will now appear in your list of sites.

---

**Add Site Coordinator Of Clinical Education**

*Search by Email*

<table>

<td><strong>Site Coordinator of Clinical Education (SCCE)</strong></td>
<td>APTA University - PT</td>
</tr>
</tbody>
</table>

**Select if the SCCE will also serve as a PT/PTA CI**

---

**Select Physical Therapy - Lemooyne**

**Select Physical Therapy - Manhattan Beach**
Manually add SCCE to a Site

To add a SCCE to a site after it is created, go to the Site list.

1. Click **Settings** from the top menu bar.

2. Click **Sites**, followed by the **Sites** icon.

3. Click on the Site name where you will be adding a SCCE.
   Note: You can have more than 1 SCCE per site listed.

4. Add the SCCE email address
   - After entering the SCCE’s email address, click **Search** to have their name populate and
   - Identify if they will also serve as a CI (now or in the future).

5. Click **Save** (shown in the image above). The SCCE name will appear in the 3rd column for the site.
   
   **NOTE:** If you check that the SCCE can serve as a CI for PT/PTA students the SCCE’s name will appear as an option to pair with students. Do not attempt to also add the SCCE under the Manage Clinical Staff button discussed later.
Step 2: Creating Cohorts

The Cohorts area allows you to name your cohorts, example Class of 2024 or Cohort 25. This is required prior to being able to add students (manually or automatically) to the CPI 3.0.

1. Click **Settings** from the top menu bar.

2. Click **Curriculum**, followed by the **Cohorts** icon.

3. Click **+ Create** in the top right corner.

4. Enter the Cohort Name (required), Title and Description (optional). Click **Save**.
Step 3: Creating Clinical Experiences

Now that the Clinical Sites and Cohorts are in the system, the clinical experiences can now be created. As mentioned, there are two methods for creating the experiences, manually and automatically/spreadsheet. The first to be discussed is the manual process, then the automatic process will be discussed.

NOTE: Make sure that new clinical experiences are created for each rotation—you cannot re-use clinical experiences that have been created.

Manual Process for Creating Clinical Experiences

The general workflow with the manual process is as follows:

1. Add/Create clinical sites.
2. Create cohort.
3. Add students as users.
4. Create batches.
5. Add CIs to their sites.
6. Add students to their clinical experience sites and pair with CIs.

Steps 1 and 2 were discussed previously and this section will pick up at Step 3.

Adding Students as Users

Upon completion of this process, all your students will be listed on the Users page with and assigned to their Cohort.

Please note: The CPI Course Completion Status column, on the users page, will be updated the first time your student logs into the CPI 3.0.

1. Click Settings.

2. Click Users, followed by the Users icon.
3. On the Users page, click **Add User** located on top right of the screen.

4. In the pop-up, enter the email associated with student’s APTA (member or non-member) account and click **Search**.

5. When the results populate, select the student role from drop-down.
Select your program from the drop-down list.

6. Select the Cohort for your student.

7. Click Add.

Creating Batches

Batches are available to help group your students, secondary to the cohorts, by their clinical experiences. For example, a student in the Class of 2025 (cohort) is in their second clinical experience (batch). Batches are commonly named by the course code of the clinical experience, but they can be named in any way to help you and other program staff.

1. Click Settings from the top menu bar.

2. Click Curriculum, followed by the Batches icon.
3. Click + Create to create your batch.

4. Enter batch name and a description (optional). Select the cohort and the students that will be included in this batch.

5. Click Save.
Adding CIs to Sites

Please note: This process can also be performed in conjunction with creating the clinical sites.

STOP: If your CI is also the SCCE for this clinical site, please refer to the above instructions for adding the SCCE to the site. Do not add them as just a CI.

For this next step, it will be important to have the email address associated with the CI’s APTA account. If you do not have the correct email address, you will receive a No Results Found message. In these circumstances, please reach out to the CIs to obtain their correct email address.

1. Click Settings from the top menu bar.

2. Find the site you want to add the CI to and click Manage.
3. In the pop-up window, click + Add User.

4. Enter the email address of the CI and click Search.
   - If ‘No Results Found’ appears after clicking Search, please reach out to the CI to obtain the email address associated with their APTA account.

5. Once the results populate, confirm the name of the CI and click Add.
Pairing Students and CIs

Now that the sites, students, and CIs are in the system, this next set of instructions covers linking all of them together.

1. Click **Settings** from the top menu bar.

2. Click **Curriculum**, followed by the **Clinical Experiences** icon.

3. Click **+ Create** to create a single clinical experience.

4. Select the Site Name, Cohort and Batch. Enter the clinical experience start and end dates. Although listed, the Midterm and Final due dates are not required.

   - If this clinical experience does not require a midterm, check the checkbox to disable the midterm.

Once all fields are completed, click **Save**.
5. The screen will automatically switch to the Student tab. Click + Add Student.

6. In the pop-up window, select the CI from the first drop-down menu and choose the student from the list of students at the bottom.

   - If your student will have a second CI, make sure they have been added to the site first, then you can select them from the third drop down menu.

   - If you will have an adjunct faculty member review the CPI of a student, make sure they have been added to the Users page, then you can select them from the second drop down menu.
7. Once all fields are filled out, click Save.

8. Upon clicking save, the entry will appear. If you want to make any changes, simply click on the student's name and the pop-up will reappear.

Click **Back to List**
9. Once you finish creating the clinical experience, it appears on the main list as Pending. To release the CPI Assessment to your student and their CI, switch the experience to **Active**.

When you make this switch, you will receive a confirmation pop-up, click **Yes, change it!**

10. To confirm the release, click PT/PTA Assessments in the top ribbon, and you will see the active evaluation. Your student and their CI will see it the same way on their screen under the PT/PTA Assessment tab.
Automatic/Spreadsheet Process for Creating Clinical Experiences

The general workflow with the automatic process is as follows:

1. Add/Create clinical sites.
2. Create cohort.
3. Obtain and complete spreadsheet.
4. Import spreadsheet to create clinical experiences.
5. Release clinical experiences to students and CIs.

Steps 1 and 2 were discussed previously and this section will pick up at Step 3.

Obtaining and Completing Import Spreadsheet

We have designed the import spreadsheet that must be used in order to properly import clinical experiences into the system.

1. Click **Settings** from the top menu bar.

2. Click **Curriculum**, followed by the **Clinical Experiences** icon.

3. Click **Import Clinical Experiences**

4. Click **Template** to download the spreadsheet template. Also linked here is the list of required fields for the spreadsheet as guidance. To access it, click **Click Here**.
The downloaded template will open to Excel. Once you open the spreadsheet, you will see the highlighted headers. Do not alter the yellow highlighted template fields. If your program does not require the information requested in the template, leave the field blank. You will not be able to upload the template if the yellow highlighted fields have been altered.

The following columns are required:

- B – Student First Name
- C – Student Last Name
- D – Student Email Address
- E – Student Cohort (must already be named in the system)
- F – Student Batch
- G – Site ID
  - This ID is found on the Sites page in the first column.
- H – Session Start Date
- I – Session End Date
- M – CI First Name
- N – CI Last Name
- O – CI Email Address
**Import Spreadsheet**

1. Once you have your data in your spreadsheet and are ready to import your data, save your spreadsheet and navigate back to Clinical Experience page in the CPI 3.0 (Settings > Curriculum > Clinical Experiences).

2. Click Import Clinical Experiences

3. Click **Browse** and find your spreadsheet, then click **Import**. Depending on the size of your file, this may take a few seconds.

4. Once the system finishes reviewing your spreadsheet, you will receive a preview screen. This screen will tell you if there are any invalid rows in your spreadsheet and the very last column, the system will tell you the error.

   In this example below, please note:

   - The first row indicates a Valid status. This means there are no errors in the data and the information can be imported into the system.

   - The second row is highlighted in red, and the last column has a status of Invalid with the reason that the CI/SCCE email does not exist in the system. In this situation, you will need to contact the CI to obtain the email address associated with their APTA account.

</tbody>
</table>

Invalid (C/SSCE Email does not exist in the system.)
Possible error messages that can be received include:

- Email does not exist in the system –
  Student email address does not match an APTA account. Please contact the student to either make an APTA account or provide you with the email address they used to make their APTA account and complete the training in the APTA Learning Center.

- Cohort does not exist in the system –
  Please follow the instructions for adding cohorts to the system, then repeat import.

- Site ID does not exist in the system –
  Please confirm on the Sites page that the site ID entered into your spreadsheet is correct.

- CI/SCCE email does not exist in the system –
  CI email address does not match an APTA account. Please contact the CI to provide you with the email address they used to make their APTA account and complete the training in the APTA Learning Center.

5. You do have the option to check the box to Skip Invalid Records and click Submit. This will import all Valid records into the CPI 3.0.

6. Once you finish importing the clinical experiences, they will appear on the main list as Pending. Please check to make sure students are paired with their CI. You can do this by clicking the number in the second column and it will show you the pairing.

   - If your student has a second CI, please use the instructions in the manual process to add the second CI to the clinical experience.

7. To release the CPI Assessment to your student and their CI, switch the experience to Active. When you make this switch, you will receive a confirmation pop-up, click Yes, change
8. To confirm the release, click **PT/PTA Assessments** in the top ribbon, and you will see the active evaluation. Your student and their CI will see it the same way on their screen under the PT/PTA Assessment tab.
Adding a Second CI

When adding a second CI to a clinical experience, it is important to note that the two CIs will be working on a single assessment. The portal does not support multiple users simultaneously working on an assessment. CIs will need to coordinate and add their rating and comments at different times so when they click "Save as Draft," their work will be saved in the assessment. Click “Save as Draft” regularly to refresh the page and save the contents.

The CIs will have to agree on a rating for each criterion. If one CI submits the assessment, the other CI will no longer be able to edit it, so make sure they confirm with each other prior to submission. Please have each CI sign off on their individual comments so that they can be differentiated during assessment review.

1. Click **Settings** from the top menu bar.

2. Find the site you want to add the CI to and click **Manage**.

3. In the pop-up window, click **+ Add User**
Enter the email address of the CI and click **Search**.

- If ‘No Results Found’ appears after clicking Search, please reach out to the CI to obtain the email address associated with their APTA account.

4. Once the results populate, confirm the name of the CI and click **Add**.

5. Click **Settings** from the top menu bar.

6. Click **Curriculum**, followed by the **Clinical Experiences** icon.
7. Find and click the site name then switch to the student tab. Click the Student's name.

8. In the pop-up window, select the CI from the third drop-down menu, then click Save.

Note: If you need to make a new CI the first listed, select the new CI as CI/SCCE and hit Save. Then, you can go back in and the system will have updated so that you can add the original CI under Second CI/SCCE.
PT/PTA Assessments
Now that your Clinical Experiences are created and the assessments are released to your student, you can track the progress of your student and CI on the PT/PTA Assessments page.

**Viewing Assessments**
1. Click PT/PTA Assessments at the top of your screen.

![Assessment screen](image)

2. Once on the screen, you will see each of the clinical experiences for your students, including their site, experience dates, cohort and batch, status of their self-assessment, the CI name(s), and the status of the CI Assessment.

![Assessment screen](image)

3. Once the student and CI have started their assessments, the status will change from Not Started to In Progress. When the status changes to In Progress, you will see a button that says View Student Assessment and View CI Assessment, respectively.

![Assessment screen](image)

4. Upon completion of the assessments, the status will change to Complete, and the assessments can be reviewed in its entirety.
5. If a student or CI need to make edits to a submitted assessment, you may **unlock the assessment** by clicking View Assessment and then Unlock Assessment at the top right of the rubric.
DCE Sign Off

1. After reviewing the Student and CI Assessment, click **DCE Sign Off**.

2. Provide your comments and select if you want to share the comments with the Student and/or CI, then click **Submit**.

3. Upon clicking Submit, the DCE Sign Off button will turn green to indicate that the sign off process is complete.
**Significant Concerns**

Throughout the clinical experience, students and CIs may submit “Significant Concerns” to the DCE/ADCE. These comments pertain to incidents that have occurred throughout the clinical experience or situations that are of concern to the student or clinical instructor(s). They can submit these concerns at any time.

When a Significant Concern is reported, the DCE and ADCE will receive an automated email notification. The Significant Concern button will populate as a red button next to the assessment—clicking on it will open the dialog box.

Here, you can review comments made by the student or CI. You can then write your comments and send a notification to the student and/or CI.

Please note: The Significant Concerns box functions as a notification service, not a communication service.
PT/PTA Reports
The PT/PTA Reports displays a quick view of the ratings submitted by students and CIs. It also allows for downloading the ratings and comments into an excel sheet.

1. Click PT/PTA Reports.

2. Adjust the filters to see any specific data. Click Apply. Click Download to have the data presented in an excel spreadsheet.

Here is an example of how the data is presented in the CPI.
Clinical Sites Profile/CSIF

The Clinical Site Profile tab (or CSIF) is a listing of clinical sites with a completed profile. This list differs from the list on your Sites page (after you click Settings). Students and CIs should look under the PT(A) Assessments tab to determine their assigned sites.

The Site Profiles includes the following information:

- Site Information
  - Address
  - Clinical Site Classifications
  - Clinical Site Location
  - Affiliated PT and PTA Educational Program
- Number of Clinical Faculty/Clinical Instructors
- Physical Therapy Services
  - Number of Patients
  - Patient/Client Lifespan and Continuum of Care
  - Patient/Client Diagnoses
  - Interprofessional Practice
- Clinical Education Experiences
- Information for Students

Viewing the completed Clinical Site Profiles/CSIF

1. Click Clinical Site Profile.
2. Use the search filters to search for a specific site name, zip code or state. Click Apply Filter
3. Once the site(s) you are looking for populates, click View Details. If the site is not already in your sites list and you want to include it in your list, click Add to My Sites.

Editing the Clinical Site Profiles/CSIF

The CSIF only shows sites that have a completed profile. Use the following instructions to edit the CSIF for a site affiliated with your program. While you have the permission to edit a clinical site profile, this should be the priority of the site’s SCCE.
1. Click **Settings** from the top menu bar.

2. Click **Sites**, followed by the **Sites** icon.

3. Click the edit icon in the last column of the row.

4. Complete the elements of each category. The orange indicators next to the category names will change to a green checkmark once all required fields are completed. Once completed, click **Save & Mark as Complete**.

**Note: Save Site Information**

- **Save As Draft** allows you to save incomplete site information without publishing it to the CSIF. Sites saved as a draft will remain in **pending** status until edits are complete.
- **Save & Mark as Complete** means all required site information is **complete** where it can be shared to the CSIF.
- **Back to Sites** brings you back to the Sites page in Settings. **CHANGES WILL NOT BE SAVED.**

**CPI Tips and Hints**

1. **Statuses:**
   - **Pending:** Make edits, hidden from users
   - **Active:** Visible in Assessments tab, able to open/submit assessments, available in Reports and Dashboard
   - **Completed:** Visible in Assessments, Reports, and Dashboard tabs
   - **Archived:** Hidden from Assessments tab, available in Reports and Dashboard tabs
   - **Note:** these statuses can be changed as necessary.

2. To search for a specific clinical experience by user, go to Settings → Curriculum → Clinical Experiences. Then, search by Student/Evaluator Name.

3. If the CI is not appearing on the Assessments tab, or if the student can see the CI but not the other way around, you must resave the pairing.
   - Go to Settings/Curriculum/Clinical Experience.
   - Click on the Clinical Experience.
   - Click on the Student tab.
   - Click on the name of the Student.
   - Click Save again.

4. In Progress and Completed assessments are available to view. Click on “View CI/Student Assessment” to view the assessment prior to signing off. To view the blank rubric, download the Paper CPI here.

5. If a CI/SCCE is affiliated with a military program, they may experience errors when completing the assessment due to firewall restrictions. Please have them attempt to access the assessment from a different WiFi network prior to reaching out to support.

6. Column widths can be adjusted by clicking and dragging the lines of the columns.

7. Clicking the three horizontal lines next to each column header will allow you to filter the column. If information is missing from a tab, please first confirm that you do not have a filter on.
8. You can right click on any chart to copy or export data.

9. Do NOT delete anything unless you are absolutely sure you do not need the information.

   • Deleting clinical experiences will delete associated assessments, if there are any.

   • Removing a CI/SCCE from a site will remove them from any clinical experiences they have been associated with and the corresponding CI assessments will also be lost.

   • Deleting a student from a clinical experience will delete the entire clinical experience, including any CI assessments.
